Seat Bracket

The first time I rode my first Madass 125 I found the seat to be uncomfortable due to the fact that it slopes forward, so I decided to fix the problem. After some experimenting I came up with the bracket shown below. It is made from 1 1/2" x 1/8" flat stock which was purchased from my local hardware store. I have since made similar brackets for my other two bikes. Drawing dimensions are approximate to give you an idea of how to make the bracket.

1 1/2" x 1/8" Flat Stock
